Democracy in Action: Teaching about the Lessons of the Kent State Shootings, May 4, 1970

Short Course One

Instructor: Carole Barbato, Kent State University

Description:
Today's students have a great deal of interest in the 1960s. It was a time of revolutionary change in the arts, politics, movies, literature, music, and style. It permeated the culture and had an influence on how people related to each other and the world around them. So many of us teaching classes today were part of that decade in our country’s history! We lived and were part of many historical events (Anti-war protests, Woodstock, counterculture movement, and the Vietnam War). However, these life experiences are far removed from the life experiences of today's students. It is oftentimes difficult to transport students back to that point in history so they might understand better the events of the times and people’s reactions to those events. In this short course, we will discuss ways of helping students experience the 1960s culture. Using the Kent State shootings as an example, we will explore ways of using cultural artifacts (film, art, literature, music, eye witness accounts) to instruct students about this tumultuous time.

Short course participants will receive excerpts from the upcoming book about the 1960s: “Time it Was: American Stories from the Sixties and Beyond” published by Prentice-Hall.

Pre-registration Required
Short Course Fee: $15.00

Using Technology in the Communication Classroom: A Practical Approach

Short Course Two

Instructors: Bonnie Jefferson, Boston College
Rita Rosenthal, Boston College
Sara Weintraub, Regis College

Description:
This short course will provide practical ideas for helping teachers incorporate technology into a variety of communication courses. Whether courses take place in large lecture halls or small classroom settings, technology may be used to enhance the curriculum and improve instruction in a variety of courses. Getting started, developing materials, analyzing best practices and assessing the use of technology in the classroom will be explored. The actual experiences of the instructors’ use of systems such as Blackboard in a variety of courses (i.e.,
public speaking, interpersonal communication and a survey course in communication) will be discussed. The instructors of the course will provide specific assignments, instructional materials and will assist participants to develop ideas for their own particular courses.

Pre-registration Required
Short Course Fee: $15.00

*Tricks of the Trade: Playing Leadership Roles In Administration*

**Short Course Three**

Instructors: Sandra L. Herndon, Ithaca College
Janette K. Muir, George Mason University
Gerald Lee Ratliff, SUNY, Potsdam
Louise Tyo, SUNY, Potsdam

*Description:*
This short course models a hands-on approach of useful strategies needed to assume leadership roles in academic administration. Presentational format is interactive and instructors will address topics related to budget-building, conflict resolution, program development, organizational communication, leadership styles, persuasive advocacy, designing action plans, and team building. This course is intended for participants who have recently assumed leadership roles or those who may have an interest in playing future leadership roles as department chairperson, dean/associate dean, division/unit head, program coordinator or director of a campus program outside the communication field. Registered participants will be provided sample handouts and resource materials. This course is limited to 15 participants.

**SPOTLIGHT PANEL: Communication at Cornell**

Panelists:  
- James Shanahan, Cornell University
- Erik Nisbet, Cornell University
- Bruce Hardy, Cornell University
- Janie Diels, Cornell University
- John Besly, Cornell University

Communication study at Cornell grew from its roots in the tradition of agricultural extension and communication. This panel focuses on how Cornell’s graduate program has become an important national center of study about the communication of science and technology, at the same time as it has cemented a position firmly within the discipline of communication. A panel of faculty and grad students from Cornell’s Media and Society Research Group discusses some of the key studies that exemplify Cornell’s contribution to our discipline.

Chair: Kathleen M. Torrens, University of Rhode Island
Participants: Crystal Fonseca, Lecturer
Jennifer J. Martin, Graduate Instructor
Tracy Scudder, Graduate Instructor
Nancy Burns-Fusaro, Instructor
Joanne Mundorf, Lecturer

In Fall 2003, the Department of Communication Studies at the University of Rhode Island introduced its basic course, Com100. The course fulfills general education and diversity requirements and enrolls approximately 1,500 students per semester. The maiden voyage team navigated issues ranging from a standardized hybrid curriculum, training first-time teachers, and adapting approaches for experienced teachers. The purpose of this conversation is to maximize our voyage forward and invite input from our audience.

Chair: Susan M. Wiezorek, University of Pittsburgh at Johnstown
Participants: Steven Curran, University of Pittsburgh at Johnstown
Michael Ferencak, University of Pittsburgh at Johnstown
John Thompson, University of Pittsburgh at Johnstown

In response to recent university-wide trends in General Education for Speaking in Content Areas, this modified symposium focuses on the Primary Public Speaking Course as it applies to more advanced students and professionals in Mathematics. Still in its developmental stage, this team-taught, interdisciplinary course explores this unique application through speaker/listener role playing presentations, while analyzing the variety of expectations, needs, and adaptations necessary for effective speaking to a range of technically adept audiences.

These papers take as their starting-point the relationship between Burke and another significant figure in 20th century literature and criticism, Ralph Ellison. Though the two men were friends for nearly 50 years—and though Ellison studied Burke’s ideas thoroughly—the two also had many points of theoretical divergence specifically focused on issues of race and racism. These papers attempt to explore some of these differences, as well as points of contact.

               Teresa M. Harrison, University at Albany, SUNY
               Jennifer Stromer-Galley, University at Albany, SUNY

Research in computer-mediated communication (CMC) must address a number of different forms of change related to diverse aspects of the phenomenon. For one thing, the nature of CMC technology, such as synchronous chat and game environments as well as the Internet itself, changes constantly as new capabilities are introduced and diffused, enabling new forms of social organization, interaction, and norms for appropriate behavior. Further, as users of CMC become more knowledgeable and experienced, patterns of social behavior change, such as relative frequencies of and preferences for the use of online versus face-to-face communication to accomplish particular goals. Finally, new social and technical systems for sharing information and collaboration also change as systems are designed, tested, implemented, and evaluated making issues of commitment and sustainability more prominent over time. The speakers on this panel discuss their research on the Internet, online social interaction, online interpersonal communication, and community information systems in light of the myriad factors that change the phenomena they study.

“Negotiating existing expectations and creating change-enhancing expectations in the teaching of sensitive topics in the basic courses”
Bei Cai, Kent State University Stark Campus

Teaching sensitive topics such as race, gender, class, sexual orientation and imperialism is not only risky but also challenging. Pre-existing expectations that students have for their professors, for themselves and for the subject matters can become learning “barriers.” At the same time, the creation of new expectations can be a powerful pedagogical tool to enhance students’ cognitive, affective and behavioral learning. This panel explores the pedagogical impact of expectations both as learning barriers and as learning tools. The format of the panel is dialogical, interactive and participatory, informed by multiple theoretical and methodological perspectives from scholars/teachers with diverse ethnic, racial, gender and national standpoints.

Great History, Greater Expectations? Communication at Penn State University  

**Participants:** Rosa Eberly, Pennsylvania State University  
Ron Jackson, Pennsylvania State University  
Chris Johnstone, Pennsylvania State University  
Denise Solomon, Pennsylvania State University  
James Price Dillard, Pennsylvania State University

Contemporary communication departments have multifaceted identities. Their functions, roles and visions are characteristically different depending upon the institution’s goals and directions. In this panel, representatives of the Department of Communication Arts and Sciences at Pennsylvania State University will cast some light on each of those facets. First, the identity of the faculty member as scholar, teacher, mentor, and citizen will be examined. An aspect of identity encompasses the Department as whole; we will explore how the variegated scholarly agendas pursued by the faculty share an essential foundation on core questions about communication. Panelists will describe the micro-cultures that are responsible for fostering diversity and appreciating the unique concerns of constituent groups. A fourth facet reflects the Department’s disciplinary identity; on this point, panelists will consider how this necessitates thinking about the ways in which the Department promotes and facilitates interdisciplinary relationships within the college, university, and academic community. Ultimately, communication scholars serve a broader role in advancing civic engagement and enhancing the quality of public discourse – to illustrate how a communication program can serve this end, we will discuss the development of citizenry in contexts ranging from the basic course to the responsibilities of communication scholars on the world’s stage.

Changing Channels: Fostering Democratic Discourse at a College Television Station
Short Course Four

Instructors: Elizabeth R. Bernat, SUNY, Plattsburgh
Jonathan R. Slater, SUNY, Plattsburgh
Lori Walters-Kramer, SUNY, Plattsburgh

This short course will address the mission, roles and uses of a student-run, campus television station, beyond a training ground for media skill development. Course facilitators examine the questions: How might your campus television station meaningfully interconnect student producers with student viewers and extramural audiences? How might the station become a site that fuses principles of both mass and speech communication? As they participate in station operations, how might students better learn the relationship between media and civic discourse, connecting their paraprofessional experiences to such larger issues as social responsibility and democratic speech? Are students using the station as a laboratory for reconciling concerns of gatekeeping, media bias, and marketplace pressures, with basic production, editing and operational techniques? The course facilitators have drawn from an ongoing series of dialogues and service-learning experiences in their own department to craft a model of a community-oriented campus television station. Attendees will learn about this model and be encouraged to discuss their own practices and perspectives.

*The Expanding Boundaries of Media Ecology: Crossing Epistemological Divides and Communication Levels*

Lance Strate, Fordham University
Catherine Waite Phelan, Hamilton College
Susan Barnes, Rochester Institute of Technology
R. Lance Holbert, University of Delaware
Janet Sternberg, Fordham University

This session will focus on current trends in the study of media ecology. Media ecology has been part of the communication lexicon since the 1930s, but has just coalesced as a field during the past decade. The participants will discuss a broad range of research trends in this area of media research, while also touching upon various strengths and weaknesses in the field. The nature of the topics to be discussed by the panelists will lead to recognition of the fact that media ecology as a field crosses both epistemological divides and levels of communication. The significance of this contribution to communication as a discipline will also be a topic of discussion.

This panel showcases research comparing and contrasting online or computer mediated communication (CMC) and face-to-face (FtF) forms of social support. The panelists focus on the healthcare context by observing groups managing diabetes, those who have lost a child,
individuals who have HIV, and people who have experienced negative outcomes from LASIK eye surgery.

This multi-disciplinary panel considers how contemporary rape-revenge films participate in the communicative process of constructing “rape” as a discursive, as well as physical, event. The papers explore how and why three recent independent films address the ongoing reality of rape as a social problem, often in marked contrast to their generic forebears from the 1970s, and argue that rape must be understood in connection with the social, political, and cultural conditions that produce and perpetuate it both on screen and off.

New Perspectives in Instructional Communication: A Hypothetical Book Project from a Graduate Seminar in Instructional Communication

Sponsor: Instructional Communication
Graduate students enrolled in an instructional communication seminar were asked to write a book chapter for a hypothetical book project. This panel showcases five book chapters and provides researchers with new research topics or new ways of investigating familiar topics. Each chapter begins with a brief review of how the topic or construct is conceptualized, a rationale, and a review of the current research literature. The chapters conclude with a list of knowledge claims, directions for future research, and a list of references.

This roundtable discussion is designed especially for graduate students, teaching assistants,
and novice faculty members who are, or anticipate, experiencing the growing pains of
teaching. There are usually conference panels devoted to one’s first year of teaching or the
first time teaching a new course, but what happens after that? Perhaps even more significant
changes occur after not once, not twice, but your third time teaching a course as you move
from trial-and-error to confidence. The discussants, each of whom has been out of their
respective Ph.D. programs for approximately 5 years, know all too well the evolutionary
process associated with teaching the same course multiple terms. And they all concur that “the
third time is a charm.” The roundtable of discussants will address common (and some
unusual) issues that arose when they used the successes and mistakes from one iteration of a
course to inform the next iterations. Their experiences span introductory to upper-level
courses, traditional pedagogy to service-learning, and full-time to adjunct teaching. Each will
reflect on how the less evolved parts of themselves as teachers (e.g., rule enforcement;
negotiated curricula) were transformed into stable and confident aspects of their pedagogy.
Tips for transforming first- and second-time challenges into third-time successes will be
provided in hard copy. There will be significant time for Q&A to address specific concerns
and interests of audience members.
This panel, formatted as a roundtable discussion, presents successful techniques for integrating discussions of gender and communication into the classroom. Following a brief overview of current gender communication research, the panel will turn to activity-based discussions that can later be incorporated into the classroom. The panel will conclude with a discussion of specific ways of engaging the broader campus in discussions of gender and communication.

Panelist: Andrew F. Hayes, Ohio State University

Reflecting on experiences teaching statistical methods for over 10 years, Andrew Hayes will discuss the importance of, approaches to, joys, challenges, and compromises of teaching statistical methods to students in the social sciences. He will suggest a variety of ways in which the field of communication can improve and advance itself forward statistically. He will end by arguing that communication programs should offer their own statistical methods courses when possible rather than outsourcing to other departments, in spite of the political challenges this gives rise to at the level of university administration.

NCA candidates for Second Vice President, Arthur P. Bochner, University of South Florida, and Pamela Cooper, University of South Carolina, Beaufort, will be available for informal discussion with ECA members. They will address contemporary issues that confront our discipline, as well as answer members’ questions.

Communicating Higher Expectations for Rhetoricians in the Academy

Sponsor: Rhetoric and Public Address
Moderator: Alfred G. Mueller II, Pennsylvania State, Mont Alto
Participants: Thomas Benson, Pennsylvania State University
Judith Trent, University of Cincinnati
Michael Leff, University of Memphis

Although many panels have already delved into useful strategies and helpful hints for graduate students seeking their first jobs or new assistant professors seeking tenure, no panels have sought to lend comfort and assistance to those who are higher in the tenure stream. Advanced
assistant professors nearing their tenure decisions are left to wonder what new expectations will be placed upon them after promotion, while associate professors are left to fend for themselves in their attempts to move upward to full professor rank. Three noted full professors in the field of rhetoric and public address will seek to communicate to audience members what higher expectations one will find in academia and the profession at large as one climbs the tenure ladder. The panelists will each offer five minutes of general commentary based upon their own experiences and then will respond to questions from audience members.

Ruma Sen, Ramapo College

Continuing a conversation begun in Boston, panelists identify challenges facing those developing minors and majors in African American, Asian, Hispanic, Lesbian/Gay/Bisexual/Transgendered, and Women’s studies as well as other areas of concentrated study. Among the issues addressed: Who should make curricular decisions? What constitutes a legitimate area of academic inquiry? Who should decide? And, what does the future hold for such studies? Participation in this roundtable discussion by audience members is strongly encouraged.

Educating Young Voters About Communication Patterns In Political Primaries
Panelist: Kathleen E. Kendall, University of Maryland

Kathleen E. Kendall has made a 22-minute educational video/DVD called “Primaries: Defining the Battle in New Hampshire” (Distributor: Films for the Humanities and Sciences). Designed for high school and college students, the production grows out of Kendall’s extensive
research on the presidential primaries, especially her book, *Communication in the Presidential Primaries* (Praeger, 2000). She worked with a professional camera crew and producer, and much of the video is set in the 2004 New Hampshire primary. The goals are to inform students about communication in the primaries and to engage their interest in the political process. Kendall will first discuss her experience adapting research findings to meet the demands of a visual medium, and then show the video and answer questions.

People often judge the success of forensics programs by trophies won. There are other ways forensics programs help fulfill a mission statement. The panel will explore ways forensics is important beyond tournament success. Issues include service learning, campus debate and discussion events, use of readers’ theatre to address campus issues (e.g., hate crimes, violence, etc.), public speaking events to stimulate action and learning diversity through travel. Panelists will suggest other ways forensics can communicate greater expectations beyond the tournament.

The Ecology of Urban Communication

Sponsor: Media Ecology Association

Participants: Gary Gumpert, Communication Landscapers
Susan Drucker, Hofstra University
Eric Gordon, Emerson College
Barbara M. Kelly, Hofstra University
S. Diane McFarland, Buffalo State College

The physical environment constitutes and facilitates, through its construction and arrangement, a domain of social interaction. It is, by definition, a communication environment. Media refers to the electronic and typographical, auditory and/or visual connection and dissemination of data. It, by definition, constitutes a concurrent communication environment. The two environments comprise the total communication environment. Cities, urban environments, are defined by both their physical and media environments. This panel seeks to explore the totality of that environment and its ecological nature.

Shirlee Levin, College of Southern Maryland
Dina Dahbany-Miraglia, CUNY, Queensborough Comm College
Catherine Waite Phelan, Hamilton College
Susan Drucker, Hofstra University
Sandra Sarkela, SUNY, Potsdam

Communication scholars have expressed concerns as to the effects that a permanent war on terror is having on the civil liberties of Americans. This panel explores the nature and implications of this challenge in terms of free speech and privacy protections, and seeks to identify and develop effective and appropriate teaching strategies to help our students grasp the significance of this political crisis to their rights as citizens and to the rights of all Americans. All members of the Eastern Communication Association are invited to attend and participate in this roundtable discussion.

**Chair:** Missy Alexander, Marist College  
**Participants:** Missy Alexander, Marist College  
Pixy Ferris, Marist College  
Jeannette Kindred, Marist College  
Shannon Roper, Marist College

This roundtable will address an ongoing discussion of the evolution of online teaching and learning. Participants will offer observations about the distinctions between enhanced and fully online courses; the relationship between the technology, the content and teaching methods; distinctions between undergraduate and graduate courses online; the ups and downs of online office hours; and the ever present issue of time.

Entertainment Media as Communicators of Expectations: *Results of Undergraduate Student Research*

**Sponsor:** Mass Communication  
**Chair:** Rebecca M. Chory-Assad, West Virginia University  
**Respondent:** Ken Lachlan, Boston College

This panel features undergraduate Communication Studies majors at West Virginia University presenting empirical research on the entertainment media’s portrayals and effects of exposure to portrayals. Students will discuss their results and provide their perspectives on the research process and how it has affected the way they think about entertainment media. Rebecca M. Chory-Assad, the students’ instructor, will discuss the instructional implications and issues involved in having undergraduates conduct mass communication research.
